

Temple Sowerby Primary School :

Clearly the children have received a lot of detailed information over the sessions and have acquired an excellent subject knowledge.

The quiz worked well and scaffolded the children's learning over previous sessions.

The group enjoyed looking at honeycomb and suitable flowers. Good for visual learners.

The opportunity to taste honey was an excellent activity and showed the children how honey can differ in taste and appearance.

There were lots of resources available for flower making.

This is what the children said:

"Amazing, we have done lots of activities. "

"I love it because I like making the flowers."

"I have enjoyed learning about bees. "
